

A Better Way to Build

Working with UNITY HOMES

We Offer Three Levels of Service

SHELL

With this offering, we fabricate and install the panelized, high-performance, weather-tight building shell and interior partition wall framing on the locally installed foundation. Once the fully-insulated shell (including windows and exterior doors) is installed, your local general contractor completes the exterior and interior of the house.

TEMPO

With this offering, we supply the shell of your house plus a selection of many finish materials and fixtures specifically curated to complement the design of your Unity home. We assist you in choosing interior and exterior components that are installed by your general contractor.

We provide Tempo packages throughout New England.

WHOLE HOUSE (Turnkey)

Locally, our project managers can oversee the construction of your house - from the foundation to the roof, and everything in-between. Depending on the project, we may also include the site work (excavation, water, septic, power) in our scope of work.

The Whole House option is limited to our local service area.
