Homes That Fit Your Aspirations

Unity homes are based on flexible design platforms that are readily customizable to our clients' needs, sites and budgets. These platforms currently include a classic tall Cape (Tradd), a bungalow-inspired single level design (Xyla), a Scandinavian-influenced Colonial (Värm), the contemporary Zum, and Unity's Nano "cottage".
The Benefits of a Unity Home

COMFORTABLE: 12" thick walls and triple-glazed windows

HEALTHY: a continuous supply of fresh air

ENERGY EFFICIENT: net zero performance can typically be achieved

INEXPENSIVE TO OPERATE: low heating/cooling loads

PREDICTABLE: off-site fabrication allows for firm budgets and compressed schedules

ADAPTABLE: Open Built systems allow for changing needs
Using state-of-the-art 3D software, we first build each home virtually to provide our clients with a clear understanding of the design, and identify potential issues before construction begins. Our fabrication process starts with computer-controlled machinery in our shop, and culminates in the rapid assembly of precision-built components on site.

Unity has developed the Nano design platform in response to the many requests we have received about smaller homes. The Nano embodies Unity’s intelligent design, high performance and efficient production in a compact package. The Nano can function as a starter home, an accessory dwelling unit (ADU), or a downsized retirement home.

Nano

THE UNITY "COTTAGE"
477-965 square feet.

Shell package starting at $55K
Tempo package starting at $70K
Whole House starting at $140K
